AETC Opens New Laboratory Training Facility

Well, it's 2013 and Accurate Environmental Training Center has hit the ground running. Accurate Environmental is proud to announce that they have recently finished expansion of their Stillwater Lab and Training Center. The new 2500 square foot expansion will be used for the hands-on laboratory training portion of their ODEQ certification classes. AETC students will continue to experience classroom training in a spacious, comfortable classroom using cutting edge presentation equipment, while the hands-on portion of the training will now take place in a professional, state-of-the-art laboratory.

The new training lab provides more working space per student, while also allowing for twice as many work stations as before. This translates into larger student capacity without sacrificing quality or quantity of hands-on training for their students. As always, AETC utilizes highly educated instructors with over 100 years of combined experience to teach their certification classes. No other training service provider can match their in-depth understanding of laboratory processes and procedures, not to mention ODEQ and EPA rules and regulations pertaining to laboratory operators. This is of particular importance considering the new EPA Quality Control requirements that will soon be implemented across the nation. With national (NELAP) and state (ODEQ) accreditation, AETC is well-equipped to provide assistance to treatment plant labs to help them establish their QC procedure and recordkeeping systems.

In an effort to connect with the various learning styles of their students, AETC uses multiple instructors for every class. This helps to break up the monotony of hearing the same person talk all week long, which aids in keeping the student's attention. Their centrally located laboratory training center in Stillwater makes training convenient for operators throughout Oklahoma. ODEQ certification exams are offered at the end of every AETC certification class, as well as the first and second Fridays of every month to maximize operator training and certification opportunities.

The purpose of AETC has always been to provide the best educational opportunities for all water and wastewater treatment operators and related personnel. With this in mind, AETC has made numerous upgrades and improvements to their training program and facilities over the years, yet they have not raised prices in nearly 10 years. Accurate Environmental realizes the importance of Oklahoma's operators and is here to support their efforts and to help them become the most effective and successful operators they can be.

26 – 28 "D" Water & Wastewater Oper

APRIL

08 – 11 "B" Water Operator
12 Open Exam Session #10850
23 – 25 "D" Water & Wastewater Oper

New AETC Hands-On Laboratory Training Facility in Stillwater

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
