

## Operator Leasing Now Available

What do you do when you find your system unexpectedly without an operator to run it? Maybe the operator quit without notice, but whatever the reason, you now have no one that is trained to run a water or wastewater treatment system, nor certified to do so. This can quickly become a very dangerous situation where the community health is at risk, not to mention being in violation of state regulations.

Fortunately, **Accurate Environmental** has a solution to your problem. The **Operator Leasing** program offers **highly certified, experienced operators to manage and operate your water or wastewater treatment system** until a suitable replacement has been found. Operator services are available as a weekly leasing service that is **custom tailored to meet the specific needs of your system**. Accurate Environmental will ensure that all necessary **monitoring tests and recordkeeping** are performed, plus, **manage daily operations** of the system. Once the system hires a new operator, **Accurate Environmental** can assist with the preparation and training of the person that will soon be responsible for the health and environmental safety of your community.

To protect the system even further, Accurate offers **Environmental Insurance**. This program includes experienced operators and a licensed engineer to provide regular **on-site visits**, help your system stay on top of **monitoring and reporting** requirements, and provide **technical assistance** for operational problems.

All of this combined is an unquestionably valuable resource to any system that finds themselves in a similar situation, or even ones that just want to provide a safety net for their system and expert advice for their operators when problems do arise.

For more information about Operator Leasing, please contact **Scott Taylor** at **(800) 516-5227** or email **Scott@accuratelabs.com**
