Don't Wait!

If you've been thinking about upgrading your class "D" Water or Wastewater certification, don't wait any longer. **Accurate Environmental Training Center (AETC)** has added **more class "C" certification classes** in 2014 than ever before. With more opportunities to find a certification class that fits your busy schedule, there's no reason to put it off any further. **AETC makes it easy** to register for classes by providing **online registration**, as well as **registration by phone**. Visit www accuratelabs.com to view training schedules, register for classes, and download all the required forms for the ODEQ exams. **AETC** is always happy to assist you by phone if you need **help selecting a class or making sure you meet the requirements for the certification you wish to apply for**. Speak with a **friendly, knowledgeable** representative that will walk you through the steps of registering for training and applying for the associated ODEQ certification exam.

It is imperative that you **plan ahead for training** and testing, so that you are able to get into the class that you need and are able to take the certification exam at the end of your class. It is a good idea to start the process **2 – 3 months in advance** so that you have time to find the class that best fits your needs, while still meeting the ODEQ's advance application requirements. **Anyone wishing to take a certification exam must submit an application to the ODEQ at least 3 weeks prior to the exam date**. Without an approved ODEQ application, you will not be able to take your test on the last day of class. Registering for training in advance allows AETC to reserve a spot for you in the class, in case the selected class fills to capacity before the 3 week deadline.

As an added convenience for operators, **AETC provides monthly open exam sessions** for anyone that was unable to meet the ODEQ exam application deadline for their class. These non-class associated **exam sessions can also be used to re-take certification exams** without re-taking the training. Open exam sessions are held on the **first and second Friday of every month in Stillwater and Tulsa**. The ODEQ's 3 week deadline also applies to the open exam sessions.

AETC's State of the Art Training Facilities

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
