Dec Xtra – UCMR, Phase II/V
Dec – Lab Supplies
Nov Xtra – Phase II/V Tests
Nov – Sampling

The Difference

Training is a crucial step in the professional development of any employee. Without proper training, the employee will take longer to become proficient at their job, and they will have less confidence in their ability to perform the necessary job duties. This results in reduced productivity and more frequent mistakes causing unnecessary increases in operational expenses, not to mention the frustration it causes between the employees and management.

Good training should provide the operator with a better understanding of his or her role in the field of drinking water and wastewater treatment. Training will help them understand the importance of their job as it relates to the health and safety of our environment and society, as a whole. **Accurate Training Center** has always strived to produce training classes that are **interesting, engaging**, and to provide a learning environment that encourages students to participate and ask questions ensuring that they understand the material and have been adequately prepared for their associated certification exams.

Over the past 20 years Accurate Training Center has been setting the standard for operator and laboratory training in Oklahoma. Take a look at some the benefits and features of the Accurate Training program:

- **One-on-one hands-on training in a state-of-the-art laboratory**
- **More hands-on training than any other laboratory classes**
- **Most ATC instructors have at least 20 years of professional experience**
- **Instructors have degrees in higher education ranging from Bachelors to Ph.D.**
- **Free follow up services for students that have questions or concerns after returning to work at their respective facilities.**

When you attend an **Accurate Training Center** class, the difference becomes obvious. **State-of-the-art facilities and experienced instructors committed to the education and success of their students helps Accurate Training Center** continuously set the standard for environmental training.

For more information or to register for training, contact Jeff Clarke at jeff@accuratelabs.com or call (800) 515-5227. Additional information, resources, and class registration forms can also be found on the ATC website at www accuratelabs.com.
