

New Sample Drop-Off Procedures

ACCURATE OPERATOR CLASSES

As you are aware, the rapid spread of the COVID-19 virus has created a lot of confusion and disruption in everyone's daily lives. Due to the high importance of having clean, safe water available for drinking, personal hygiene, and cleaning needs, those of us in the water treatment industry are critical pieces of that puzzle and must be more vigilant than ever to ensure effective treatment and disinfection of water supplies.

Accurate Labs is no different. All three labs will remain open for normal business hours, although drop-off procedures have been modified to help protect clients and staff. Public access to the labs has been restricted and sample drop-off points have been established that will limit the physical interaction between individuals. You can find more information using the link on our website homepage at www accuratelabs.com.

When you arrive at one of the labs, look for the signs that will direct you to the new, temporary drop-off points at each location. Laboratory staff will be there to accept the samples, complete the necessary paperwork, and provide you with additional sample containers as needed. Accurate Labs staff is following the CDC and ODEQ guidelines and recommendations for minimizing the risk of infection by practicing frequent hand washing and disinfection of common areas. For everyone's safety, clients are asked to take the same precautionary measures as well.

This is a situation that few have experienced before. We are all learning and adjusting as we go, but as long we each do our part to mitigate the spread of this new coronavirus then we can get back to our normal lives in the near future.

If you have any questions or concerns about the new sample drop-off procedures or laboratory services, you can contact Accurate Labs by calling (800) 516-5227 or email Danny@accuratelabs.com

Due to the increased health risks associated with groups of people in close contact spreading the COVID-19 virus, Accurate Training Center is making decisions to postpone or cancel training classes on a weekly basis. So far, only the March classes have been cancelled.

If you are registered for operator or laboratory training in April or May, we will contact you as soon as possible to notify you of any scheduling changes.

If you have questions about your registration or our certification classes, contact Jeff Clarke at (800) 516-5227 or email Jeff@accuratelabs.com

Three Accurate Labs & Training Center Locations in Oklahoma:

Tulsa
3910 E. 51st St.
918-663-5400

Stillwater (HQ)
505 S. Lowry St.
405-372-5300

Oklahoma City
12036 N. Penn
405-751-3132

ATTENTION: Accurate Labs - Stillwater Clients

Given the recent developments with the spread of the coronavirus, Accurate Labs has temporarily reduced public access to its facilities. Clients dropping off samples at the Stillwater lab will enter through the atrium door between the two buildings (shown below).

An Accurate Labs staff member will be there to accept the samples and complete the necessary documentation. Only Accurate Labs staff will be allowed in the main buildings.

If you have any questions or concerns. Please contact us at (800) 516-5227 or email Danny@accuratelabs.com

Thank you for your understanding and cooperation.

Accurate Labs & Training Center

ATTENTION: Accurate Labs - Tulsa Clients

Given the recent developments with the spread of the coronavirus, Accurate Labs has temporarily reduced public access to its facilities. Clients dropping off samples at the Tulsa lab will enter through the south door on the east side of the building (shown below).

An Accurate Labs staff member will be there to accept the samples and complete the necessary documentation. Only Accurate Labs staff will be allowed beyond that point, at this time.

If you have any questions or concerns. Please contact us at (800) 516-5227 or email Ken@accuratelabs.com

Thank you for your understanding and cooperation.
