Environmental Training

For more than **20 years** Accurate Environmental Training Center (AETC) has been providing Oklahoma Department of Environmental Quality (ODEQ) **continuing education and certification training** for water and wastewater operators and lab technicians throughout the state of Oklahoma. In 1998 **Accurate Environmental Training Center** began offering refresher classes for annual license renewal, then quickly grew to offer **all levels of water and wastewater operator and laboratory technician certification classes**. Accurate now schedules around **60 classes per year** and offers nearly **30 different subjects**, not to mention **custom and specialized classes** designed to meet the specific needs of their clients.

AETC has eight highly educated, certified instructors on staff – most with at least **20 years of experience**. Classes are held in **state-of-art training facilities** at their headquarters in **Stillwater**, as well as the **Tulsa Lab and Training Center**. AETC strives to provide a **welcoming and comfortable learning environment**, and instructors that are **invested in the success of their students**. In fact, instructors are available any time outside of class for **one-on-one instruction** to ensure that the students understand the material. One of the goals of AETC is **to produce knowledgeable, successful operators**. Poor training puts unnecessary stress on the operators and often leads to high turnover, not to mention the risk to public health.

Accurate Environmental Training Center offers:

- Highly educated instructors with decades of experience
- Most hands-on lab training of any service provider
- Cutting edge facilities and equipment
- Post-training support for AETC students
- Convenience - classes in Stillwater and Tulsa
- Custom and on-site training
- 24 hour emergency contacts for operators
