- 27 – 29 **D W&WW Oper**

Exam Applications must be submitted to ODEQ at least 3 weeks prior to the scheduled test date. Download the application at www.accuratelabs.com

Accurate Knowledge...

“Through learning we re-create ourselves. Through learning we become able to do something we were never able to do.” ~Peter Senge

There have been a couple changes/additions to the upcoming class schedule that I want to mention this month:

1. The **“C” Wastewater Lab** class that was originally scheduled for March has been rescheduled for **May 10th – 13th**. There’s still time to sign up, so contact us today for more information or to schedule your enrollment.
2. Also, we added an **Activated Sludge** class in Tulsa on **Tuesday, May 4th**. This will be an 8-hour general training class focusing specifically on the Activated Sludge process. This is an approved DEQ class that may be used to meet certification renewal training requirements. There is no exam associated with the Activated Sludge class.

For more information about AETC classes, or to enroll, contact **Jeff Clarke** at **(800) 516-LABS** or jeff@accuratelabs.com

Accurate Labs Adds Client Access Feature to Website

At Accurate Environmental we are always looking for ways to improve and better serve our clients. A recently added website feature is going to help us do just that. The new **Client Access** feature on our website allows clients to access their data as soon as it is ready to be reported. Using the Client Access feature, you are able to look up reports based on the laboratory received date, and have results displayed on your computer without having to wait for your report to show up in the mail. Once the data is in the database, clients can retrieve that report information at any time just by logging into the system. **Contact Danny Chance to set up your website account at (800) 516 – LABS or email danny@accuratelabs.com.**
