

## Increased E.Coli / Fecal Coliform Monitoring Begins in May

Reminder – Summer limits for wastewater disinfection begin May 1<sup>st</sup>. Be sure to check your discharge permit. Most wastewater treatment systems that discharge have lower limits for E. coli or Fecal coliforms in the summer (May 1<sup>st</sup> – September 30<sup>th</sup>) and the sample frequency increases to twice per week. **Check with Accurate Labs about scheduling, sample bottles, and chain of custody forms.**

For more information or to discuss sample scheduling contact Danny Chance by calling (800) 516-5227 or email [Danny@accuratelabs.com](mailto:Danny@accuratelabs.com).

## Annual DEQ License Renewal Training

All ODEQ operator and laboratory licenses expire on June 30<sup>th</sup> each year. Every certified operator and lab technician must obtain at least 4 hours of DEQ approved training by the end of June in order to keep your licenses current.

If you have not taken any DEQ training since July 1<sup>st</sup> of 2017, then you need to contact Accurate Training Center to schedule your renewal training before the classes are full. Accurate Training Center offers 4-hour refresher classes every week in Tulsa and Stillwater throughout the month of June (see the June refresher class schedule to right of this article). A full listing of classes schedules can be found at [www accuratelabs.com](http://www accuratelabs.com).

For more information about classes or certification requirements contact Jeff Clarke at (800) 516-5227 or email [Jeff@accuratelabs.com](mailto:Jeff@accuratelabs.com).

## ACCURATE RENEWAL CLASSES

### STILLWATER CENTER

#### JUNE

07 (PM) W & WW Refresher  
14 (AM) W & WW Refresher  
21 (PM) W & WW Refresher  
28 (AM) W & WW Refresher

### TULSA CENTER

#### JUNE

05 (PM) W & WW Refresher  
12 (AM) W & WW Refresher  
19 (AM) W & WW Refresher  
21 (PM) W & WW Refresher

The general refresher classes are designed to refresh the operator's understanding of water treatment processes, water sampling, and laboratory quality control. The refresher classes are also open to questions and discussion of other industry-related topics that will help the operator develop a better understanding of his or her role in protecting the public and our environment through the treatment of drinking water and wastewater.
