## Did You Know...?

**Accurate Environmental** is one of the nation's most unique and comprehensive environmental services provider. We not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but we also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

**Accurate Labs** is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. We provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. We are nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

**Accurate Environmental Training Center (AETC)** is an award winning training center offering operator and laboratory certification and renewal classes at our classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, we are able to tailor our training to meet the needs of each individual student.

**Accurate Laboratory Supplies (ALS)** is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along our routine sample pick-up routes.

**Accurate Field Services**, with our team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. We also have weekly sample pick-up routes to provide our clients with a fast, economical, and safer way to get samples to our lab for analysis.

**Accurate Environmental/Engineering Services (AES)** provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance and reduce operating costs.
