## Hands-On Laboratory Training

Accurate Training Center (ATC) has been providing water and wastewater laboratory training classes for over 20 years. ATC instructors each have **more than 20 years of lab experience**. Accurate Training Center classes provide **more hands-on lab training than any other training facilities**. Approximately half of the student's class time is spent in a working lab, getting **hands-on experience under the guidance of professional laboratory experts**. Through knowledgeable and experienced instructors, state-of-the-art facilities and equipment, and extensive hands-on training for each student, the **passing rate for first-time class "C" Lab test takers at ATC is an outstanding 95%**.

An experienced operator uses the test results provided by the lab tech to determine the appropriate actions to maintain or improve the treatment system. The quality and accuracy of the data is of utmost importance, since operational decisions will be based on the data provided by the lab tech. When an operator can do his own process control tests, he is able to better monitor the system in real-time and identify developing problems. This is a critical factor in the successful operation of any treatment system, regardless of size or type.

**The goal of Accurate Labs & Training Center is to produce the best lab techs possible.** It is important that Accurate students are comfortable with the skills they develop in class, and know that **support is just a phone call away**.

### Features and Benefits of the ATC Laboratory Training Program:

- Highly educated instructors with over 20 years of laboratory experience
- More hands-on training than any other service provider
- State-of-the-Art laboratory equipment
- Post-training support for ATC students
- 24-hr contact Info for drinking water emergencies

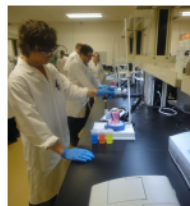

For more information about Accurate Training Center certification classes and testing, or to register for training, contact Jeff Clarke at Accurate Training Center.
