NEW ANNUAL RENEWAL TRAINING REQUIREMENTS

It's license renewal time again! All ODEQ operator and laboratory certifications expire on June 30th. This year, the requirements have changed. The new training requirements are based on your highest level of certification. For example, if you have a "D" Water and a "B" Wastewater license, your renewal training requirement will be based off of the class "B" license. If you have "C" Water Lab and "D" Water Operator certifications, required training would be based on the class "C" lab license. At least 4 hours of the required training must be classroom training. The remainder can be done in class or online. If you only have "D" licenses, you will have to do classroom training for your 4 hours.

Here are the **new annual renewal training requirements** based on certification level:

Class "D"	4 hours
Class "C"	8 hours
Class "B"	12 hours
Class "A"	16 hours

Accurate Environmental Training Center (AETC) has **all-level refresher classes** scheduled **every Tuesday and Thursday** throughout the month of **June**. We will have a **morning session** and a different **afternoon session** each of those days. That way, an operator can get **8 hours of training in the same day**, which will be much more convenient for the many operators with class "C" or higher certifications. A portion of a regular certification class can also be used for renewal purposes, but the certification class must be the same level, or higher than what you currently hold.

AETC renewal classes are designed to **refresh or expand the operator's knowledge**. Our goal is to provide training that will **make you a better operator** and give you more **confidence in your abilities**. AETC is offering several different 4-hour refreshers this June including **Operator Math** for both water and wastewater, **Process Troubleshooting** for water and wastewater, and **Sampling**. There will be classes in **Tulsa every Tuesday and every Thursday in Stillwater**. Since training requirements have increased, the classes are filling quickly. Be sure to register for renewal training at **Accurate Environmental Training Center** before the classes fill up.

SEE PAGE 2 FOR THE JUNE REFRESHER SCHEDULE

If you have questions about AETC classes or to register by phone, please contact **Jeff Clarke** at **(800) 516-5227** or email jeff@accuratelabs.com
