ODEQ RENEWAL TRAINING

Your DEQ license renewal training must be completed by June 30th, 2021. Accurate Training Center has 4-hr refresher classes Monday thru Thursday during the month of June.

Specialized Testing Services: PFAS Analysis

PFAS and PFOS are man-made chemicals used in surface protection products such as carpet and clothing treatments, and coatings for paper and cardboard packaging often used in the food industry, and many other everyday products. Other uses include non-stick cookware and firefighting foam. PFAS often finds its way into aquifers causing drinking water contamination affecting homes, businesses, and municipalities for miles around the contamination sites. PFAS and PFOS compounds do not biodegrade, resulting in accumulation in the environment and animals, including humans. These compounds are known to cause adverse health effects for those exposed to the compounds which include reproductive, developmental, and systemic effects (liver and kidneys). **Accurate Labs** has always been on the leading edge of providing **specialized testing** services that few other labs in the country can offer. **Accurate Labs** has been **EPA certified for PFAS testing** since 2011 when the compounds were included in the first Unregulated Contaminant Monitoring Rule (UCMR). **Accurate Labs** has provided **PFAS testing services** to clients in Oklahoma, Michigan, New York, New Jersey, and Colorado, to name just a few. They have also assisted in PFAS research projects with Oklahoma State University.

Contact **Accurate Labs** if you are concerned about possible PFAS contamination or to request a PFAS sampling kit. Highly **skilled and experienced environmental scientists** using **state-of-the-art instrumentation**, combined with **extensive quality control** procedures, will analyze the samples ensuring that you are provided with the **best data quality possible** with some of the **quickest turnaround** times in the industry. Once completed, you will be provided an analysis report of the identified compounds.

For more information about the **PFAS testing services** contact **Danny Chance** at (800) 516-5227 or email Danny@accuratelabs.com
