Career Advancement Through Training

Accurate Environmental Training Center (AETC) provides operators with training and testing opportunities to help you **obtain and upgrade** your ODEQ water and wastewater certifications and **advance your career**. AETC offers the **"D" and "C" Operator** training in 2-day classes, and 4-day classes for the **"A" and "B" Operator** and **"A", "B" and "C" Labs**. The online ODEQ certification **exams are offered on the last day** of every AETC certification class. Classes are scheduled year round at **Accurate Environmental Training Center's Stillwater and Tulsa** facilities, making it easy to find the class you need, when you need it.

AETC has seven ODEQ certified instructors on staff, and uses multiple instructors to teach each class. Their **instructors all hold degrees** in higher education ranging from Bachelors to Ph.D., and **each is an expert in the subject they teach**. Using more than one instructor to teach each class allows the instructor to teach their area of expertise, while also providing **variety in teaching styles** to keep the student **interested and involved throughout the learning process**.

Students will find that AETC has worked very hard to develop **curriculum that maximizes the student's learning potential** by having instructors that are **educated, experienced, and passionate** about the health and well-being of the environment and our communities. Students are also provided with study materials, practice exams, and a team of **dedicated instructors** that are available before, during, and after class for any extra help or follow up questions. In fact, AETC encourages all of their students to contact them with any questions or concerns that may come up once the students have completed training and returned to their facilities.

Accurate Environmental Training Center has been offering ODEQ certification and renewal classes **since 1998**. Their goal has always been to provide the **best training possible** for the **education and advancement** of water and wastewater operators and lab technicians. AETC has not implemented a price increase in over 10 years, while continuously improving and upgrading their training program and facilities. AETC takes great pride in the quality of their training program and encourages you to visit them online or contact them today learn more about their award winning training centers.

Still Need Renewal Training?

June 30th has come and gone. You should have already received a renewal notice in the mail from the State and taken at least four hours of approved training so that you can renew your ODEQ water and/or wastewater certifications. If you still need to get your annual 4 hours of renewal training, Accurate Environmental Training Center has several opportunities to get your training in by the end of July. Review the schedule above to find out when AETC has certification classes coming up. Then, contact AETC to see if there is space in the selected class. You can attend 4 hours of any AETC certification class to meet your annual license renewal training requirement. If you have not received your renewal form from the DEQ, you should contact them to update your mailing address and to request a form. Don't sit by let your license expire. Contact Accurate Environmental Training Center if you have any questions about license renewals.

Questions, comments, or suggestions? If you have a question or comment about something you've seen in our newsletter, or if you have suggestions about topics you would like to read about in future newsletters we would like to hear from you. Email your comments or suggestions to jeff@accuratelabs.com .

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
