Accurate Environmental

Accurate Environmental is one of the nation's most unique environmental services provider. Accurate has five divisions offering comprehensive environmental services to clients across the country.

Accurate Labs is comprised of three full-service laboratories in Stillwater, Tulsa, and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through the NELAC Institute, as well as being state certified through the ODEQ. Accurate Labs is the only commercial lab in Oklahoma fully certified for drinking water analysis, and one of the few labs in the nation offering specialized testing such as PFAS, Cryptosporidium, and radiological testing for drinking water.

Accurate Environmental Training Center (AETC) operates classrooms in Stillwater and Tulsa. It is the only commercial water and wastewater operator training center in Oklahoma. For nearly 25 years, AETC has offered operator and hands-on laboratory certification training, as well as professional development and continuing education classes. Accurate also offers on-site certification classes and custom training to meet the specific needs of their clients.

Accurate Environmental Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, soil, sludge, and hazardous waste. Experienced operators and a professional engineer can help treatment systems meet EPA and ODEQ regulations, improve plant performance, and reduce operating costs.

Accurate Field Services provides field and sampling services throughout Oklahoma. Accurate Field Services Techs can provide grab sampling, composite sampling, and even custom sampling projects. Accurate Field Services also runs weekly sample pickup routes that can provide clients with a fast, economical, and safer way to get samples to the lab for analysis.

Accurate Laboratory Supplies (ALS) can save their clients valuable time and money on laboratory supplies, chemicals, and equipment. One simple phone call to order all your supplies that can be picked up at the labs, drop shipped directly to client, or FREE DELIVERY on our routine weekly Field Service routes.

For more information about Accurate Environmental
and the many services they offer,
