LICENSE RENEWAL TRAINING

Accurate Environmental Training Center experienced a record number of students for their 4-hour June refresher classes this year. With a total student count approaching **400 for the month of June** alone, AETC is very pleased to have been able to assist in the continuing education of many of Oklahoma's operators and lab technicians.

AETC offered a variety of **4-hour refresher classes** in multiple topics at both training centers in **Stillwater and Tulsa** this past June. Subjects included **sampling, water and wastewater system operations math, and water and wastewater system troubleshooting**. With the recently increased renewal training requirements for advanced level operators and lab techs, **AETC will be adding additional refresher classes** to their class schedule in the coming renewal periods, including **Quality Assurance and Quality Control**.

All AETC 4-hr refresher classes each June can be used to renew ANY LEVEL of laboratory or operator certification.

The goal of **AETC** is provide operators and lab techs with **educational opportunities** that will **increase their knowledge** and provide them with the tools necessary to **understand their roles** as operators to **become successful** operator and lab technicians.

If you have not completed your annual license renewal training for this year, don't wait and get it scheduled as soon as possible. Not all certification classes can be used for all levels of certification renewal training. Options may be limited for many, so don't miss your opportunity. Contact AETC today to schedule your renewal training as soon as possible.

For more information about **Accurate Labs & Training Center** classes contact **Jeff Clarke** at **405.372.5300** or email Jeff@accuratelabs.com .
