Laboratory Skills Training

Training is the foundation of an operator's success. Through quality training, the operator not only learns the basis of his or her job, but also the importance of their roles in the treatment system, as well as the community they serve. Operators with lesser training tend to experience more stress from a lack of understanding and less job satisfaction, which results in high turnover rates. In addition, many costly mistakes are made due to a lack of adequate training. **Accurate Training Center** understands the need for **high quality, in-depth training** from both a management and an operational standpoint. Operators must understand their jobs thoroughly in order to be efficient and effective. But even the best operators need good management to guide them and continuously help develop their skills.

Accurate Labs & Training Center laboratory classes are taught in a state-of-the-art nationally certified laboratory by instructors with over 20 years of experience. ATC instructors are able to **help new lab techs learn the basics**, plus **help experienced lab techs expand their knowledge and develop their management skills**. About half of the laboratory training time is spent doing hands-on analyses in a working a lab. Think of it like a driver's license... just because a person can pass the written test, doesn't mean they are ready for the road. In this case, not being ready can result in a widespread risk to public health, not to mention tens of thousands of dollars in fines for operational or reporting mistakes that are made based on incorrect laboratory test data.

- **Instructors with over 20 years experience**
- **50% of class time spent doing hands-on training**
- **State-of-the-art facilities and equipment**
- **Able to accommodate large classes (and even small ones when necessary)**
- **Exceptional passing rates for all levels of lab certification**

When you need the **best possible training** for your laboratory technicians, there's only one place to go... **Accurate Labs & Training Center**.

For more information about **Accurate Labs & Training Center** classes contact **Jeff Clarke** at **405.372.5300** or email Jeff@accuratelabs.com .
