Environmental Insurance Program

Accurate Environmental Insurance is a **technical assistance program** to help your system stay in compliance with ODEQ and EPA regulations, and to determine corrective actions when necessary. The program also serves as a **liaison between regulatory agencies, the city manager or utility director, and the operators** providing a resource to answer questions and improve communication between the different groups. Accurate's team of water professionals includes a **licensed professional engineer, eight certified operators**, including class "A" Water and class "A" Wastewater operators with many years of experience. The **Environmental Insurance** program is **designed to meet the needs of your system** and may include the following:

- Operational Guidance
- Troubleshooting
- Sample Scheduling – review of sampling requirements and permit limits
- Monthly Operational Report (MOR) Review
- Discharge Monitoring Reports (DMR) – prepare monthly DMR
- Notice of Violation (NOV) – assist with response and corrective actions
- Monthly On-Site Visits

The **Environmental Insurance** program is the **ideal solution for small to medium sized systems** that are having trouble meeting limits or have a high turnover rate for their operators. By utilizing the **Environmental Insurance** program, your treatment system will have **consistent oversight by high-level operators** that are familiar with your operations and can ensure it continues to run efficiently and remains in compliance even as regulations change and new operators come and go. ***How can you afford not to have Environmental Insurance?***

For more information about the **Accurate Environmental Insurance Program** contact **David Kincannon, P.E.** at **(800) 516-5227** or email David@accuratelabs.com
