## Hands-On Laboratory Training Laboratory Training the Way It's Supposed to Be

Accurate Environmental Training Center (AETC) has been providing top quality ODEQ renewal and certification classes for the past **25 years**. AETC offers all levels of operator and laboratory **certification classes**, as well as all-level DEQ-approved **renewal classes**. All AETC classes provide some of the highest quality training in the state, but our laboratory classes are where we really stand out above all others. All AETC lab classes incorporate **more hands-on training** in a working lab than any other training service providers in Oklahoma. Each student is required to participate in practical training in the lab to ensure the student understands the analysis method and be able to demonstrate proper technique.

AETC classes are taught by **instructors with degrees** in higher education, not to mention **decades of experience** in the operation and management of environmental laboratories. Each lab class spends nearly **50% of class time** in the laboratory **doing hands-on training** in a 2500sf wet chemistry lab with access to state-of-the-art testing equipment such as gas chromatograph and ion chromatograph systems, that few other lab techs will ever see, let alone having the advantage of working with.

For more information about **AETC** training classes, contact **Jeff Clarke** at **405.372.5300** or email **Jeff@accuratelabs.com**
