Environmental Insurance: How Can You Afford Not To Have It?

Accurate Environmental prides itself on being an innovative leader in the environmental field. We focus on **meeting our clients' needs with the most practical and cost effective solutions possible**. Our environmental services division has **over 30 years of experience in design, operation, and troubleshooting** of drinking water and wastewater treatment systems. As water quality regulations become more stringent, some treatment systems have trouble meeting the reduced contaminant limits. Some engineering firms will quickly recommend building a new treatment plant, but often times, operational adjustments can be made that will allow your current plant to produce higher quality effluent that meets DEQ and EPA requirements for a fraction of the cost.

Accurate Environmental offers a service called **Environmental Insurance**. This program helps **ensure that you are meeting state and federal regulations while operating your system as efficiently and cost effectively as possible**. Look at some of the many **benefits of the Environmental Insurance program**:

- Expert technical assistance
- 24/7 on-call technical advice
- On-site monthly inspections
- Treatment process troubleshooting
- Monthly and annual reporting assistance
- Correspondence with regulatory agencies
- Plant performance and capacity evaluations

These are just a few of the features and benefits of the **Accurate Environmental Insurance** program. For more information **contact David Kincannon at (800) 516-5227 or email David@accuratelabs.com**.
