Hands-On Laboratory Training & Quality Assurance Program Assistance

Accurate Environmental Training Center (AETC) offers laboratory technician training that is second to none. **Highly educated instructors with extensive environmental laboratory management experience help AETC students learn proper analytical procedure** and the theory behind it. Nearly half of every lab class is spent in a working laboratory doing **hands-on training**. Being the largest commercial laboratory in Oklahoma and nationally certified, we have had **decades of experience** working with state and federal regulatory agencies, which makes **AETC** perfectly suited to **train treatment plant lab technicians** for the strict quality control procedures that are required since Oklahoma became a member of the National Environmental Laboratory Accreditation Program (NELAP).

AETC also offers **laboratory quality assurance and quality control (QA/QC) program services**. Accurate's laboratory experts will assist you to set up a **QA Program for your laboratory** as well as provide **training for the QA procedures** and documentation. Since **Accurate Labs** has been state and nationally certified for many years, there are **few organizations that are as experienced** with laboratory procedure and quality control. Now that Oklahoma is a NELAP state, it is important for treatment plant supervisors to understand and prepare for the strict quality control that is now required.

Classes are held year-round making it convenient to find a class that fits your needs and schedule. And if necessary, **AETC** can even provide on-site training. For the most complete and comprehensive lab training available or to request assistance with your QA program, contact Accurate Environmental Training Center.

For more information about laboratory or QA program assistance, contact Jeff Clarke at 800-516-5227 or Jeff@accuratelabs.com
