10 – 14 **A Water Oper**
25 – 27 **D W&WW Oper**

Accurate Environmental Training Center

Registering for an ODEQ certification class requires some advance planning and preparation. If you do not follow the correct steps, you could find yourself showing up for a class that has been rescheduled or is full, or you may sit through the course only to find out that you are not approved to take the certification exam on the last day of class. In order to avoid the frustration and embarrassment, please read through the following registration procedure:

1. **Contact Jeff Clarke** at Accurate Training Center to register for the selected class. Try to do this at least **one month** in advance. This allows us to notify you of the status of the class and reserve a spot for you. It will also give you some extra time to submit your exam application to DEQ. The AETC Training Class Calendar can be viewed online at www accuratelabs.com. You can also use our **online registration** form to enroll in any AETC certification and renewal classes.
2. **Complete the ODEQ Exam Application** packet and **mail or fax it** to DEQ along with your **application fees**. The DEQ requires a minimum **3-week advance application** for all certification exams. If it is postmarked or faxed less than 3 weeks before the test date, the application will be rejected, and the operator will not be allowed to take the certification exam. The exam application can be downloaded through our website.

Following the simple steps mentioned above will save you a lot of time and trouble when planning your next certification or license upgrade. Don't wait, or you may miss your opportunity to get into that next class you need. Call today to sign up!

For registrations or more information about AETC classes contact
Jeff Clarke at (800) 516 – 5227 or jeff@accuratelabs.com

Web Based Client Access

Outstanding customer service has always been an important goal for **Accurate Environmental Laboratories**. We take great pride in being able to produce the **highest quality data** with some of the **fastest turnaround** times in the industry. In our constant effort to better serve our clients, we recently added a **Client Access** feature to our website, so that our clients can have **faster** and **easier** access to their reported data. You no longer need to wait for your analysis reports to arrive in the mail before you can see the results. Now, clients can simply **login** to the system to retrieve **current** or **past** report information at any time.

Our hope is that the **Client Access** feature will be a very useful tool by giving you access to reported information when **you need it**. And, getting started couldn't be easier. Simply contact **Danny Chance** at (800) 516-LABS or Danny@accuratelabs.com to set up your website account.
