Operator & Laboratory Training

Accurate Training Center (ATC) began offering water and wastewater operator classes in 1998. ATC started with license renewal classes, then expanded to offer **all levels of water and wastewater certification classes** shortly thereafter. Since training is a critical aspect of any person's success in their job, **ATC** has made educating the operator a priority. An operator is a person who should be able to run a treatment system, identify problems, and possess the ability to solve those problems. But, without a solid understanding of how the treatment process works, the operator will be unable to effectively operate and troubleshoot the system. Just because a person can pass the certification exam, doesn't mean they will be an effective operator. That comes down to the process knowledge they get from quality certification training to build upon with plant specific on-the-job training.

Some classes provide mere test preparation, but don't help the operator understand why we do the things we do in water and wastewater treatment. Without that deeper understanding, it will take longer for an operator to become effective and efficient, if they ever do. **ATC classes** are designed to transfer knowledge to the operator that will give them the foundation necessary for developing into top notch operators capable of operating and managing treatment systems. **ATC** can do this by employing **experienced operators and lab techs** with **degrees in higher education** that have been teaching ODEQ certification classes for **more than 20 years**.

In short, an operator with a good base understanding of how treatment systems work is not only going to be able to pass their certification exams with flying colors, but they will also be more competent operators who are able to truly manage a treatment system. Without adequate training, that person will often be little more than a certified helper. So, choose **Accurate Training Center** for your operator and laboratory training needs to ensure that your **operators and lab techs** are getting the **best environmental training** possible

For more information about operator training, please contact **Jeff Clarke** at **(800) 516-5227** or email **Jeff@accuratelabs.com**

OPERATOR & LAB CLASS SCHEDULE

STILLWATER

OCTOBER

06 Open Exams
10-12 D W & WW Operator
18-19 C W Operator
23-26 A/B WW Laboratory

NOVEMBER

03 Open Exams
07-09 D W & WW Operator
15-16 C WW Operator
27-30 C W Laboratory

DECEMBER

01 Open Exams
05-07 D W & WW Operator
18-21 C WW Laboratory

TULSA

OCTOBER

13 Open Exams
16-17 C WW Operator
23-25 D W & WW Operator
30-11/2 A/B W Operator

NOVEMBER

13-14 C W Operator
17 Open Exams
27-29 D W & WW Operator

DECEMBER

08 Open Exams
11-14 A/B WW Operator
18-20 D W & WW Operator

IMPORTANT!!!

DEQ exam applications must be submitted to the state at least 3 weeks before your class.
