Environmental Training

Accurate Environmental Training Center (AETC) has been providing operator and laboratory technician training since 1998. Over the last 20 years they have become one of the most highly regarded water and wastewater training centers in Oklahoma. AETC classes are taught by **experienced instructors in state-of-the-art training facilities** in both Stillwater and Tulsa. This year, AETC moved to a new location in Tulsa that doubled their facility size. As AETC class sizes have increased, the need to increase classroom size and parking became obvious as well. **Accurate's new Tulsa Lab & Training Center** has allowed them to better serve clients with **larger, more comfortable learning spaces** and **cutting-edge presentation equipment** that rivals that of any school or university.

Classes offered at AETC Tulsa include **all levels of Water and Wastewater Operation**, and **4-hour refresher classes** for annual license renewals. **Instructors with over 20 years of experience** are there to **ensure that students understand** the material and can **work with them one-on-one** when needed. **AETC** classes not only prepare students for the ODEQ certification exams, but also prepare them for the responsibilities of being water and wastewater system operators. After all, what good is a license if the person still has no idea what they are doing? Inadequate training not only puts unnecessary stress on the operator, but also puts the community at risk.

For more information about **Accurate Environmental Training Center** classes, or to enroll in classes, **contact Jeff Clarke at (800) 516-5227** or email Jeff@accuratelabs.com.
