- Dec – PFAS/PFOS
- Sep Xtra – TPH Fingerprint
- Sep – UCMR5
- July – DEQ Renewal Training

## Legionella Testing

**Accurate Environmental Laboratories** is a trusted resource for Legionella testing, playing a vital role in safeguarding public health and preventing the spread of this dangerous bacterium. Legionella is a waterborne pathogen responsible for causing Legionnaires' disease, a severe and sometimes fatal form of pneumonia. Regular and accurate testing for Legionella is crucial to ensure that water systems in various settings, from homes and businesses to healthcare facilities, schools and public institutions, remain safe and free from this harmful microorganism. In fact, all medical facilities must have a legionella testing program.

**Accurate Environmental Laboratories** uses **cutting-edge technology** and **rigorous testing protocols** to identify and quantify Legionella bacteria in water samples. By offering precise and **timely results**, they enable their clients to take proactive measures to mitigate the risk of Legionella exposure. This is particularly important in places like healthcare facilities, where vulnerable populations may be at higher risk of contracting Legionnaires' disease.

**Accurate Environmental Laboratories'** Legionella testing services extend to cooling towers, hot tubs, and other water systems, which are known sources of Legionella contamination. These tests are not only essential for public safety but also crucial for ensuring compliance with industry regulations and standards.

By providing comprehensive Legionella testing, **Accurate Environmental Laboratories** demonstrates its commitment to public health and the well-being of the community. Their dedication to accurately identifying and quantifying Legionella in water systems is a testament to their role as an invaluable partner in the prevention of waterborne diseases, making them a trusted source for Legionella testing in Oklahoma and beyond. With their services, clients can rest assured that their water systems are safe and that the risk of Legionella-related illnesses is minimized.

If you have any questions or would like more information about **Legionella testing**, or any other testing services, contact **Danny Chance** at [Danny@accuratelabs.com](mailto:Danny@accuratelabs.com) or call **(800) 516-5227**.
