## NEW LAB EQUIPMENT ENHANCES CAPABILITY

**Accurate Labs** has recently acquired several new **state-of-the-art analytical instruments** which will **enhance their already superior environmental testing capabilities**. Here are four new instruments that are being, or already have been added to the Organics division of **Accurate Labs**:

### Agilent 7890B GC/ECD System:

This Gas Chromatograph (GC) will be for Haloacetic acid analysis (HAA5), replacing an older 6890 GC as the primary instrument for this analysis. The new GC will be faster for increased sample analysis.

### Agilent 7890B/5977A Inert Mass Spectrometer for VOC GCMS Analysis:

This instrument will be an addition to the 3 other GCMS we have for VOC analysis but will have increased sensitivity and reproducibility.

### Tekmar HT3 Headspace Analyzer:

This instrument works with a Gas Chromatograph with Mass Spectrometer (GCMS) for Volatile Organic Compound (VOC) analysis. This auto-sampler is able to statically sample a portion or dynamically sweep the heated headspace of environmental samples. By doing this type of prep, we are able to analyze more complex matrices or other types of samples that would have not been possible before.

### Agilent 1260 Infinity HPLC System:

This High Performance Liquid Chromatograph (HPLC) will be for Glyphosate, Diquat and Carbamate pesticide analysis (EPA Methods 547, 549 & 531). This will be an upgrade to a previous system and will allow for better sensitivity and new software for data analysis.

**Accurate Labs** is constantly looking for new and better ways to serve their clients, which is how that have become a **nationally certified laboratory and the largest commercial lab in Oklahoma**. By staying abreast of current industry trends, and having the **experience and insight** to see where the industry is headed, **Accurate Labs** is always prepared to **provide unmatched customer support** to ensure the client receives the **highest quality service and best possible data** from some of the **most knowledgeable experts** in their fields.

For more information about Accurate Labs or to get a quote for laboratory services contact Danny Chance at (800) 516-LABS or [danny@accuratelabs.com](mailto:danny@accuratelabs.com).

## STILLWATER CLASSES

### DECEMBER

**01 – 03** "D" Water & Wastewater Oper  
**07 – 08** "C" Wastewater Operator  
**11** Open Exam Session #12849

### JANUARY

**05 – 07** "D" Water & Wastewater Oper  
**11 – 12** "C" Water Operator  
**15** Open Exam Session #12959  
**25 – 28** "C" Wastewater Laboratory

## TULSA CLASSES

### DECEMBER

**04** Open Exam Session #12848  
**09 – 10** "C" Water Operator  
**15 – 17** "D" Water & Wastewater Oper

### JANUARY

**08** Open Exam Session #12957  
**13 – 14** "C" Wastewater Operator  
**19 – 21** "D" Water & Wastewater Oper

For more a more complete class listing or to view class descriptions, register for classes online, or download ODEQ exam applications, visit [www accuratelabs.com/trainingcenter.php](http://www accuratelabs.com/trainingcenter.php) .

## Registering For Classes and Exams

When you plan to take a certification class and exam, you must register for them separately. In other words, sending in your application to the ODEQ for the exam you plan to take, does not automatically sign you up for the associated training class. Therefore, once you have chosen a class and exam that you wish to take, you should **contact Accurate Training Center to register for the class** and make sure that it's not full. When you register with Accurate Training Center **you will receive a confirmation letter with the class info** that is needed to complete the ODEQ exam application. **Remember...** the **exam applications must be submitted to the ODEQ at least 3 weeks before the class** you plan to take. For more information or to register for training **contact Jeff Clarke at (800) 516-5227 or [jeff@accuratelabs.com](mailto:jeff@accuratelabs.com)**.

**Questions, comments, or suggestions?** If you have a question or comment about something you've seen in our newsletter, or if you have suggestions about topics you would like to read about in future newsletters we would like to hear from you. Email your comments or suggestions to [jeff@accuratelabs.com](mailto:jeff@accuratelabs.com) .

**Accurate Environmental** is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

**Accurate Labs** is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

**Accurate Environmental Training Center (AETC)** is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

**Accurate Laboratory Supplies (ALS)** is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

**Accurate Field Services**, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

**Accurate Engineering Services (AES)** provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
