The Right Training Can Make A Difference In Your Future

DECEMBER 2016

Drinking water and wastewater operators and lab technicians are required to obtain certifications according to the Oklahoma DEQ Rules and Regulations Title 252 Chapter 710. In order to qualify for certification exams, the operator must meet training and experience requirements set forth by these rules. There is no choice or flexibility with those requirements. But, what you do have a choice of is where to obtain the required training. **Accurate Training Center** has been providing **ODEQ approved certification and continuing education classes** to Oklahoma's operators and lab technicians **since 1998**.

Accurate Training Center was founded on the idea that operator training should not only **prepare the operator for certification exams**, but it should also help them **realize the importance of water treatment and the critical role of the operator** at every level of the process. **Accurate Training Center** classes are designed to educate the operator and provide them with the **knowledge and confidence that are necessary for success**. Few jobs have such a far reaching effect through their day to day operations. One mistake can put thousands of people at risk. That is why **Accurate Training Center** has made it their mission to **protect our communities and environment** by providing the **best training** possible and offering a **24-hour support system** for operators that have questions or problems once they have returned to their facilities.

Accurate Training Center is unique because they can also **design custom and specialized training classes** to meet the specific needs of their clients. **Accurate has the experience and expertise** required to be able to design custom classes for **municipal and industrial water treatment, lab equipment and quality assurance procedures**. Most classes are held at **Accurate Training Center in Stillwater or Tulsa**, but classes **can also be held at the client facility**. This can be a very practical solution in situations when the client has a large group of people to be trained or when custom training for specific equipment and treatment processes is needed.

Here are just a few of the unique and specialized classes that AETC offers:

- ⇒ Biological Processes
- ⇒ Process Control Calculations
- ⇒ Disinfection Byproducts
- ⇒ Hands-On Lab Training
- ⇒ Quality Assurance and Quality Control
- ⇒ Environmental Sampling

Whatever your environmental training needs, **Accurate Training Center** can help you **establish a knowledgeable, well-trained staff of operators and laboratory technicians**. Operators that attend AETC classes quickly realize the value of the program and can **return to their facilities with confidence** knowing they have received the highest **quality education**, and that a **support network** of environmental scientists and experts are **only a phone call away**. For more information, contact **Jeff Clarke** at **(800) 516-5227** or email **Jeff@accuratelabs.com**.

STILLWATER CLASSES

DECEMBER

02 Open Exam Session #13552
06 – 08 "D" Water & Wastewater Oper
12 – 13 "C" Wastewater Operator

JANUARY 2017

03 – 05 "D" Water & Wastewater Oper
06 Open Exam Session #13633
09 – 10 "C" Water Operator
30 – 02/02 "C" Wastewater Laboratory

TULSA CLASSES

DECEMBER

09 Open Exam Session #13553
14 – 15 "C" Water Operator
20 – 22 "D" Water & Wastewater Oper

JANUARY 2017

13 Open Exam Session #13635
18 – 19 "C" Wastewater Operator
24 – 26 "D" Water & Wastewater Oper

For more a more complete class listing or to view class descriptions, register for classes online, or download ODEQ exam applications, visit www accuratelabs.com.

Registering for Classes 24/7

The **Accurate Environmental Training Center website** contains many resources for operators and lab technicians, including a **calendar of classes** where you can **view upcoming classes month by month, class descriptions, class/exam numbers, and DEQ exam application deadlines**. You can also **register for classes through the Accurate Training Center webpage**. Check out the training calendar to find a class that you would like to attend and to get the class details. Then click the "Enrollment Form" link in the division menu of the web page. Complete the online form and submit it. Once your enrollment has been processed, you will receive a **confirmation email verifying all of the class details**. The **ODEQ exam application and study guides can also be downloaded** from the **Accurate Environmental Training Center website**. Visit www accuratelabs.com/training-center for more information.

Questions, comments, or suggestions? If you have a question or comment about something you've seen in our newsletter, or if you have suggestions about topics you would like to read about in future newsletters we would like to hear from you. Email your comments or suggestions to jeff@accuratelabs.com.

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
