Accurate Training Center: Building Skills Beyond The Classroom

Hands-on experience turns classroom lessons into practical skills, helping laboratory professionals understand not just how to perform a test, but why each step matters. **Accurate Training Center**'s new **hands-on training lab** gives students opportunities to practice techniques, work with equipment, and strengthen the skills needed for reliable results.

The expanded facilities include a new **60-seat classroom** with **state-of-the-art** presentation technology, building upon the existing **50-seat classroom** to accommodate more students and support engaging instruction.

Each laboratory instructor brings nearly **30 years of laboratory experience and over 20 years of teaching experience**, connecting technical concepts with practical examples and challenges students may encounter on the job. Their guidance helps participants **build confidence, improve technique, and develop stronger problem-solving skills**.

Since 1998, **Accurate Training Center** has provided high-quality operator and laboratory training. These investments continue that commitment, giving students more opportunities to learn by doing and apply their knowledge in the workplace.

For more information about Training Services, contact Jeff Clarke at (800) 516-5227 ext. 144 or Jeff@accuratelabs.com.
